I have asbestosis of the lungs, because of this disease i am no longer able to work. Because of this disease i can't buy life insurance. As of yet my disease is non-cancerous but at the same time it is disabling. I am no longer able to do many thing's i normally was able to do, because of this disease. I believe those corporations should be held responsible for knowingly and willingly using product's that are harmful and sometimes fatal to humans. I do not think the MI Supreme Court should interfere with my rights as a victim of this disabling disease.(Asbestosis), to collect damages. Thank-You
